Forecast for Wednesday 10 May 2023

Weather: A bright start to the day for most areas perhaps ranges further west seeing more cloud to start. Showers will develop, more readily in the west at first but spreading east through the afternoon. A few heavier showers likely in the afternoon and some thunder is a possibility. Showers tending to die out through the evening period with some late sunshine, remaining cloudier in the west.

Chance of cloud-free hill tops above 800m: 70%, cloud associated with showers and early morning low cloud.

Low Cloud and visibility: Scattered cloud above 500m first thing in the morning, perhaps more patchy in the west, low cloud will lift and disperse to leave most summits clear for a good part of the morning. Lower cloud may become scattered above 600m in the afternoon in showers but summits often clear.

Met Office Aberdeen Meteorologist's View

Feeling warm in sunny spells but still chilly on the tops, especially in any heavier showers, there may be hail in a few heavy showers at height.

Forecast for Thursday 11 May 2023

Weather: Cloudy in the west initially otherwise a bright start. Further sunshine and showers developing during the day. Showers dying out in the evening but mist and fog likely to develop by the evening especially for eastern ranges.

Maximum wind: North 10-15mph.

Chance of cloud-free hill tops above 800m: 60%

Low Cloud and visibility: Scattered low cloud above 500m will come and go during the day, during showers and early in the morning and later in the evening, perhaps less cloud likely in the west.

Temperature: **Glens:** Plus 7 rising to 13 Celsius.
At 800m: Plus 1 rising to 7 Celsius.
Freezing level: Above all summits
